

SUMMARY

Backend-focused Software Engineer with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Computer Networks. Experienced in building scalable backend services, REST APIs, database-driven applications, and AI-powered systems using **Java, C++, Python, SQL, Flask, FastAPI, MySQL, MongoDB, and Firebase**. Passionate about designing reliable, low-latency software systems and solving complex engineering problems through clean architecture and scalable backend solutions.

EXPERIENCE

- NexusKraft**

Application Developer | Flutter, Firebase, Android Studio, Razorpay, WebRTC, APIs

June 2025 – Dec 2025

Remote, India

– Developed API-driven applications integrating authentication, real-time messaging, appointment scheduling, payment processing, and cloud data synchronization using Firebase services.

– Designed modular service layers and reusable business logic following clean architecture principles, improving maintainability and reducing feature integration effort.

– Integrated third-party REST APIs including Razorpay and WebRTC while ensuring reliable request handling, error recovery, and asynchronous workflow execution.

PROJECTS

- **TrueVision - Deepfake Detection System**

Flutter, OpenCV, PyTorch, Flask, Firebase

Jan 2026 – Mar 2026

– Built a modular media processing pipeline leveraging OpenCV and PyTorch for preprocessing, inference execution, and prediction generation while achieving 83% classification accuracy.

– Integrated Firebase Storage and Firestore for secure media persistence, inference logging, and metadata management.

– Structured the backend into independent processing modules, enabling maintainable deployment and easier future scaling.
- **Rakshak: Women Safety Platform**

Flutter, Python, Firebase, Twilio, Gmail API, Gemini

Feb 2025 – Apr 2025

– Developed backend-driven emergency response workflows supporting voice-triggered SOS, fall detection, live location tracking, and automated incident reporting.

– Designed asynchronous event-processing services to manage emergency alerts, timed safety check-ins, and media uploads without blocking user interactions.

– Implemented secure cloud-based data storage and real-time synchronization for user profiles, emergency contacts, and location updates.
- **Query Wizard – Multilingual NL-to-SQL Engine**

Python, Streamlit, Gemini API, MySQL, Google Translate API

Oct 2024 – Dec 2024

– Developed a backend service that converts multilingual natural language queries into optimized SQL statements using Gemini API and executes them on MySQL databases.

– Designed a context-aware session management system to preserve conversational history and enable iterative query refinement.

– Optimized backend request flow and database interactions, reducing redundant processing during consecutive conversational queries.

TECHNICAL SKILLS

- **Languages:** Java, C++, python, SQL, JavaScript
- **Frameworks & Libs:** Flask, Flutter, FastAPI, React.js, Next.js, Streamlit, Scikit-learn
- **Backend:** Flask, NodeJs, REST APIs, JWT Authentication
- **Cloud & Databases:** MySQL, MongoDB, AWS, Git, GitHub
- **Core CS:** DSA, OOP, DBMS, Computer Networks, Operating Systems

EDUCATION

Degree	Institute / Board	Score	Passing Year
B.Tech – CSE (AIML)	G.L Bajaj Institute of Technology and Management (AKTU)	8.0 / 10	May 2026
Class XII	Central Board of Secondary Education (CBSE)	90%	April 2022
Class X	Central Board of Secondary Education (CBSE)	87%	April 2020

ACHIEVEMENTS

- **Samsung Solve for Tomorrow – AI Track (National Finalist):** Ranked **Top 5** among **20,000+ teams** for an AI-powered real-world solution.
- **NVIDIA DGX Trainee:** Selected for advanced training on GPU-accelerated computing, deep learning, and AI model development workflows.
- **Hackathon Achievements :** 2× Winner of the **Bharat Shiksha Expo Hackathon** and Winner at the **U.P. International Trade Show** for designing and delivering innovative technology solutions.
- **Patent Holder (3 Indian Patent Applications) :** Filed patents for an **Automated AI-Powered Database Handler Using NLP**, an IoT-enabled public **transport monitoring system**, and an Android-based **eco-friendly driving assistance** solution, demonstrating innovation across AI, embedded systems, and mobile technologies.
- **Competitive Programming:** solved **500+** coding problems across [LeetCode](#) and [GFG](#). with a peak LeetCode rating of 1550, demonstrating strong foundations in Data Structures and Algorithms.
